Hack 110!

- Comp 110 Hackathon!
- 7:00 PM on Dec 1 to 12:00 PM on Dec 2 in Sitterson Lobby
- Two tracks: web development and game development
- Plenty of workshops + fun!
- Free food + swag!
- *Great for beginners!*
- http://tinyurl.com/app23f
- Apply by Nov 21!
- Questions: Email Kaleb (kalebw02@ad.unc.edu)

CL12 - OOP Practice

```python
class Team:

    team_name: str
    players: list[str]

    def __init__(self, inp_name: str, inp_players: list[str] = []):
        self.team_name = inp_name
        self.players = inp_players

    def __add__(self, player_name: str):
        self.players.append(player_name)

    def __str__(self) -> str:
        info: str = f"{self.team_name}: {self.players}"
        return info

team0: Team = Team("Wombats")
teammates: list[str] = ["Alyssa", "Jayden"]
team1: Team = Team("Rockets", teammates)
team0 + "Shefali"
team0 + "Lauren"
print(team0)
```

Memory Diagram

```python
class Team:

    team_name: str
    players: list[str]

    def __init__(self, inp_name: str, inp_players: list[str] = []):
        self.team_name = inp_name
        self.players = inp_players

    def __add__(self, player_name: str):
        self.players.append(player_name)

    def __str__(self) -> str:
        info: str = f"{self.team_name}: {self.players}"
        return info

team0: Team = Team("Wombats")
teammates: list[str] = ["Alyssa", "Jayden"]
team1: Team = Team("Rockets", teammates)
team0 + "Shefali"
team0 + "Lauren"
print(team0)
```
